

Proof of decontamination equipment

General

In order to prevent the employees of the technical department for chemical and/or biological hazards, **it's important that you wash and rinse your equipment thoroughly with water or other non hazardous material or remove chemicals in another way**. Chemical or biological hazard can cause physical and/or health risks for these employees, especially if it's unknown what they can expect inside the equipment.

This Proof of Decontamination serves the safety and health of the employees of the Technical Department. This, in accordance with the infectious diseases law and the accident insurance of the business associations.

We ask for your understanding for the fact that we can only handle your equipment, if this proof is shown. So, please fill in the form and put this clearly visible on the equipment.

Proof of decontamination - equipment submitted for repair
